CUBES

2017/2018

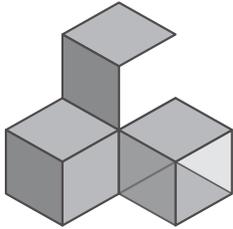

enJoiner offers wooden modular buildings opening up the possibility of designing the spatial arrangement on your own. Our solutions will help you create a practical and cosy extra space for your house and its surroundings by erecting a garden atelier according to your concept and needs. The CUBE can be easily arranged into a cosy shelter with a spa or a sauna as well as a comfortable office studio.

enJoiner addresses the expectations of Clients who are nature lovers but who also cherish comfort and luxury. Therefore, our cube becomes a heavenly place due to its cosiness and closeness of nature.

We have designed a range of small houses and gazebos, including LIFE CUBE, RELAX CUBE, FUN CUBE and DEK decks which blend perfectly with the surroundings. Our products are based on eco-friendly technology, whereas their form and technical parameters can be tailored to individual taste, needs and the scenery.

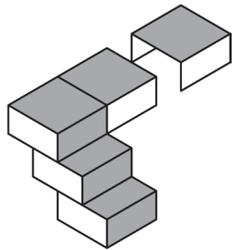

Each of our unique houses has a cubic form, and its MODULAR CONSTRUCTION allows for customisation in order to suit any taste. The Cube can be easily erected, installed and rearranged into either closed or open space, depending on your imagination and desires.

Our idea is to play with blocks – you are invited to join us and have fun!

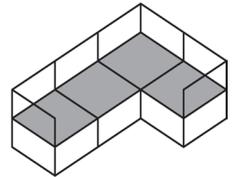

### CUBE

Our houses have a cubic structure, thereby allowing for easy customization. Modular panels can be freely arranged and configured in order to offer either open or closed space which will be both functional and tailored to your individual needs.

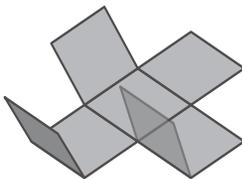

### DEK

DEK system enables the construction of terraces, platforms, footbridges, decks and wooden walkways by means of pre-made modules in any configuration and arrangement.

### FURNITURE

Our offer includes pieces of furniture which perfectly match the aesthetics and the concept of modularity with the products offered by enJoiner.

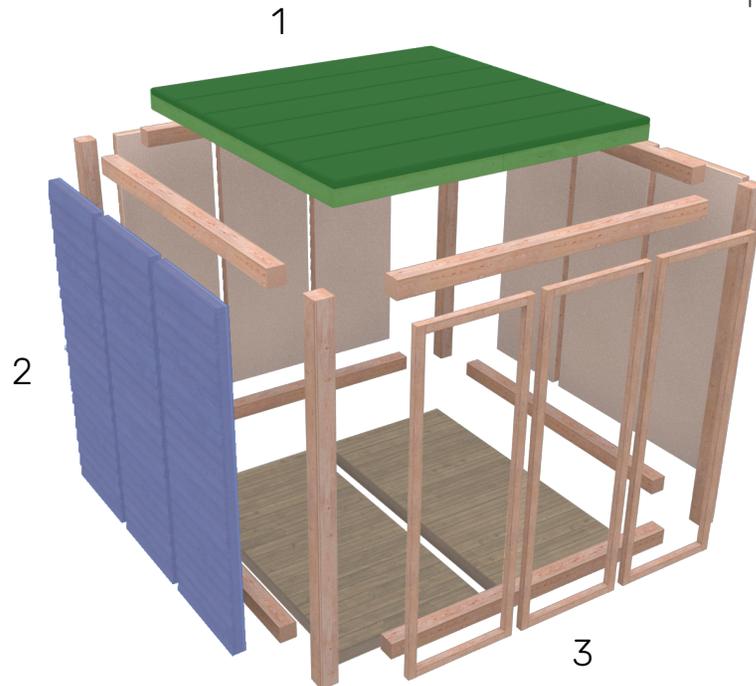

### COMPLEX SERVICES

We do our best to bring your dream cube design to life. Therefore, we are there for you throughout the whole project from the very beginning till the end. Not only do we take care of the design, but we also offer counseling, providing you with specialist advice on the project, and we supervise and run maintenance services.

## Create your own CUBE!

IT'S EASY! :)

DESIGN + PANELS = CUBE

- Choose the location for the CUBE, whether you would like it to be PLACED / HANGED / FLOATING
- Decide on the function of the building
- Determine the number of modules (CUBES) of the structure
- Choose PANELS for your DREAM CUBE
- Place an order
- On the basis of information you have provided us with, we produce an individual visualization of your concept
- You can erect the CUBE ON YOUR OWN or let us take charge of installation

## Choose ...

### 1. CEILING PANEL

We offer a range of products for a roof structure. You can choose between classic ceiling panels providing complete blackout effect, panels with a decorative truss and transparent roof panels with trusses.

Another practical solution is a roof shutter which enables you to control your indoor-outdoor space.

### 2. WALL PANEL

Our offer includes a variety of wall panels depending on the functions of the Cube. You can choose between light controlling PANEL systems, transparent PLEXI panels and slatted panel systems, all of them available in sizes 1/2 and 1/3.

### 3. FLOOR PANEL

We recommend a terrace DEK, permeable floor systems or flooring with a heating system.

Floor panels available: 1/2 and 1/3.

YOUR CUBE IS READY! :)

# LIFE CUBE

... inspired by life

Our projects and realisations arised from an innovative approach to constructing small modular houses.

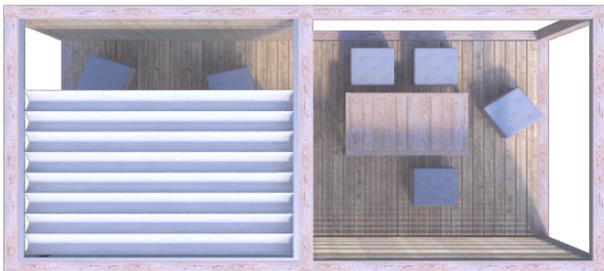

The combination of the CUBE and the DEK system allows for the establishment of a practical and comfortable relax zone. A single module of the external surface of 9 square metres has been extended by the DEK system of the same surface area which together form a coherent whole.

The above solution will surely satisfy those who would like to take advantage of their garden during summertime and to transform part of the green area into a cosy office studio. The LIFE CUBE may also serve as a gazebo for guests.

A wooden relaxation cube with a blue sofa and a vertical garden. The cube is made of light-colored wood and has a blue sofa with two cushions. A vertical garden with various green plants is attached to the side of the cube. The floor is made of dark wood.

# RELAX CUBE

... time for YOU

Here, HUD panels system has been implemented which gives you a sense of freedom and offers a cosy space open for fresh-air enjoyment. Automatic vertical and horizontal sun protection systems bring relief from overexposure to sunlight. Two modules of a total area of 18 square metres allow for countless arrangements of your own space. The CUBE is a perfect solution for clients who seek a practical extra space for their house.

# SUNNY CUBE

... feel the sun

enJoiner

ZŁOTY  
WAWRZYN

The SUNNY CUBE offers an attractive design due to its transparent walls. Therefore, its simplicity combined with elegance is pleasing to the eye. A single module of the external surface of 9 square metres is both easy to arrange and spacious due to its fancy design and glass elements. The SUNNY CUBE is an enticing offer for the garden area as it combines aesthetic value and functionality, but it may well be used as an exhibition room.

# FUN CUBE

... enjoy the space

The structure of the FUN CUBE allows for endless possibilities as far as creating and arranging the Cube are concerned. An open space which is equipped with rain and wind protection systems has been designed to bring you comfort. The sail which has been placed on top of the CUBE makes the design both functional and attractive. As the FUN CUBE provides shelter from the sun, it is particularly recommended to be placed near hotel beaches, restaurants and any facilities where creative solutions are highly desired.

# FULL PANELS

ZŁOTY  
WAWRZYN

FULL PANELS are made of various façade planks, thereby protecting the CUBE against adverse weather conditions. In order to differentiate between several plank types, we have established the following categories for our self-finished panels: SOFTLINE, BUDMAX, DIAGONAL and CLASSIC. Panels can be placed in either a vertical or horizontal position. There are two sizes available depending on the aesthetics and the functions the CUBE may serve: 1/2 and 1/3.

1/2 VERTICAL SOFTLINE PANEL

1/3 VERTICAL SOFTLINE PANEL

1/2 VERTICAL BUDMAX PANEL

1/2 VERTICAL BUDMAX PANEL

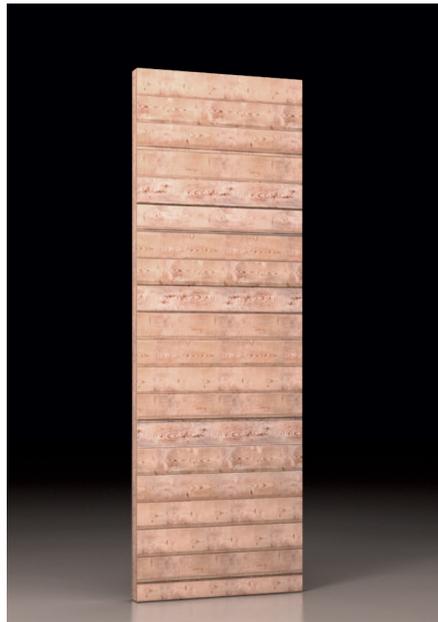

1/2 HORIZONTAL DIAGONAL PANEL

1/3 HORIZONTAL DIAGONAL PANEL

1/2 HORIZONTAL CLASSIC PANEL

1/3 HORIZONTAL CLASSIC PANEL

# SLATTED PANELS

SLATTED PANELS serve as subtle solar shading devices since they arrange the space, form partition walls and produce a translucence effect at the same time. SLATTED PANELS enable to achieve unusual aesthetic effects with an ideal arrangement to be carried out as they both carry the artistic value and protect against the sun or wind.

# TRANSPARENT AND ROLLER PANELS

Transparent PANELS will help you carefully but effectively separate the area from the surroundings, turning it into a cosy and comfortable zone with sufficient exposure to light. The panels also protect the CUBE against adverse weather conditions. Transparent panels can be complemented by roller shutters which help regulate the amount of sunlight in the room.

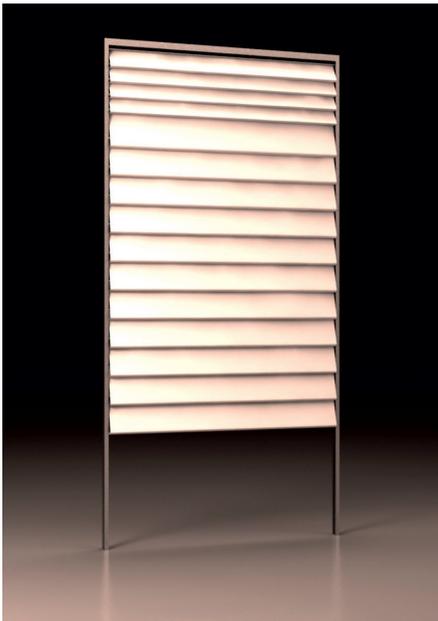

PLEXI 1/2 PANEL

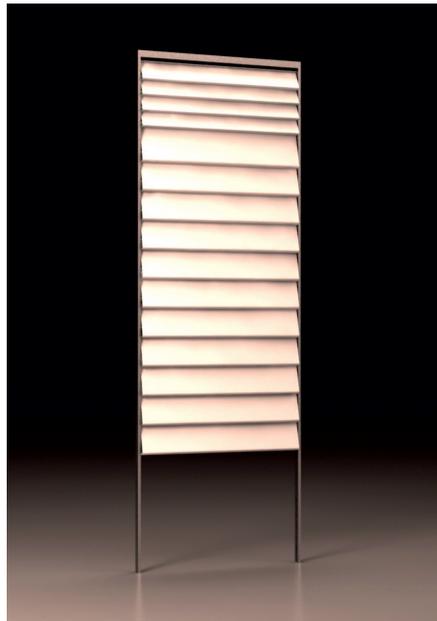

PLEXI 1/3 PANEL

PLEXI PANEL grants unlimited access to daylight and also protects against adverse weather conditions. We also accept special orders for panels with a glass unit which are available in our offer.

PLEXI PANEL systems may satisfactorily function as exhibition rooms and showrooms due to both free penetration of sunlight and reflection of the light installation inside the cube. Panels made of solid polycarbonate are also available.

1/2 ROLLER SHUTTER PANEL

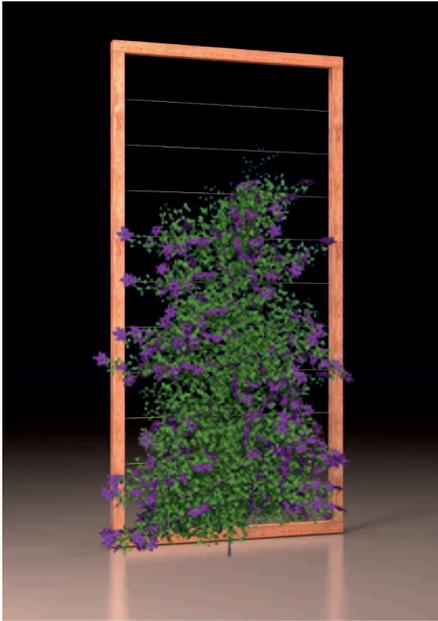

1/3 ROLLER SHUTTER PANEL

We offer ROLLER SHUTTERS with a metal frame which are renowned for their high level of durability and structural strength and they also provide shelter from the rain, the sun and the wind. You can also use the shutters to create an open building.

ROLLER SHUTTERS are a perfect solution for the vertical shading of the CUBE. They enable the creation of an airy building concept but also offer protection from excessive sunlight or rain.

STEEL ROPE  
PANELS

1/2 LINE HORIZONTAL PANEL

1/3 LINE HORIZONTAL PANEL

1/2 LINE HORIZONTAL/ VERTICAL PANEL

1/3 LINE HORIZONTAL/ VERTICAL PANEL

PANELS reinforced with coated stainless steel ropes in a vertical or horizontal layout which can support the climbing plants requiring more space to grow.

This PANEL is perfect for a CUBE designed to retain its natural character as it harmonizes with the landscape. This solution enables the creation of light modular structures with a trellis or a pergola.

PANEL reinforced with coated stainless steel ropes, in a cross-shaped layout enabling the climbers to grow on it exponentially. Carefully selected steel ropes help to support the plants which use petioles or tendrils to attach to the structure.

This PANEL is perfect for a CUBE designed to retain its natural character as it harmonizes with the landscape. This solution enables the creation of light modular structures with a trellis or a pergola.

... comfort and joy

# FURNITURE

The design and function of the MODULAR SOFA combine well with the CUBE.

There is a range of moisture insulation materials in various colours and patterns to choose from.

HANGING SOFA, mounted on ropes fixed to the structure of the building.

The filling of the mattress is a combination of foam and a coconut mat which altogether offer a high standard of comfort.

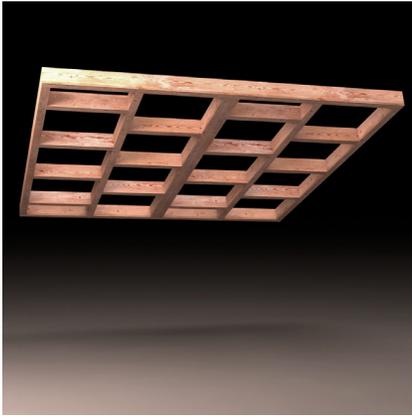

HANGING BED, mounted on ropes fixed to the structure of the building.

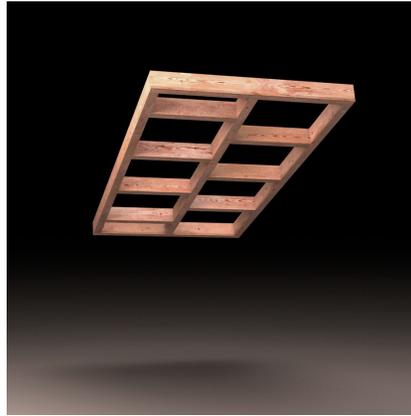

We offer larch wood and sapele wood to name a few. The filling of the mattress is a combination of foam and a coconut mat which altogether offer a high standard of comfort.

A photograph of a wooden structure, possibly a greenhouse or a small garden shed. The structure features a wall on the left made of horizontal wooden slats, creating a lattice effect. The main wall is made of vertical wooden planks. On the right wall, three white rectangular planters are mounted vertically, each containing various green and red plants. A small white table with a small potted plant sits on the wooden floor in front of the wall. The ceiling is made of wooden beams and panels. The text 'CEILING AND FLOOR PANELS' is overlaid in white on the left side of the image.
